6 Inside the new fraud arms race
An interview on identity, AI and the changing face of fraud
BY SEPIDEH ROWLAND, CAFP, CCBCO
Artificial intelligence is transforming fraud at an unprecedented pace. Fraud expert Mike Cook explains how criminals are using AI, deepfakes and fraud-as-a-service to outmaneuver traditional controls — and what financial institutions must do to keep up.

16 Models for identifying high-risk complaints and UDAAP signals
BY CHRISTA CARTER AND LYNN WOOSLEY, CRCM
Can artificial intelligence help identify consumer harm before it becomes a regulatory problem? Learn how large language models and machine learning can help financial institutions detect emerging UDAAP risks, prioritize high-risk complaints, and strengthen complaint monitoring through effective governance.

26 How AI is reshaping the build vs. buy decision and why governance considerations help shape the outcome
BY SOVAN SHATPATHY
AI is making it easier than ever to build software, but speed alone doesn't determine success. Learn why governance, production readiness and lifecycle management now drive the build-vs.-buy decision for financial institutions.

36 Lock in Your CRA loan register: What to report, what to avoid and how to prepare for filing
