

## **ABA COSO Implementation Peer Group**

The COSO Implementation Peer Group is designed to help ABA members stay abreast of issues facing banks as they implement the COSO Internal Control Framework. The group facilitates the exchange of ideas on issues, problems and solutions relating to both migration to the 2013 framework from the original 1992 Framework, as well as first-time implementation. A benefit of joining is the ability to network with others via the COSO Implementation member directory. The COSO Implementation peer group also holds conference calls every other month for its members, and there is no requirement with regard to commitment of time. Upon the request of peer group members, additional calls and/or targeted educational calls can also be held. There is no charge for participation.
