

Timely and Actionable Threat Intelligence for Community Banks & Credit Unions

FS-ISAC helps Financial Institutions protect themselves against physical and cyber threats and attacks posed by terrorism, cyber criminals, terrorists, nation states, and other malicious adversaries.

Financial Institutions (FIs) of all types and sizes – 6,000 banking, insurance, brokerage, payments, hedge fund and credit card companies – join the FS-ISAC to:

- Gain actionable insights into the latest security threats, vulnerabilities, trends, and technologies
- Gather additional details in a timely manner about a specific attack
- Learn about other institutions' experiences and mitigation strategies through anonymous and attributed submissions
- Remain current with what federal, state, and local government agencies, regulators and law enforcement are doing
- Protect and secure their data and mitigate risk

The Source for Critical Information

The member-owned FS-ISAC performs four broad functions:

1. Foster cooperation and communication among member FIs, to their mutual benefit, using a secure trust network
2. Gather information about threats against the financial services industry, including member submissions, plus unique access to domestic and international government resources
3. Research and analyze information received to validate accuracy and severity, and recommend actions
4. Disseminate insights into threats and mitigation strategies to members using secure and effective methods, depending on the urgency and nature of the alert

Foster Cooperation

Perhaps the biggest impact that FS-ISAC has is getting Financial Institutions talking with one another. Through regularly scheduled calls, in-person meetings, rapid and timely sharing between and among members, webinars and other communication paths, community banks and credit unions are able to learn what peer organizations are facing, how they're responding, and generally share information.

- Attendance at member meetings - Semi-annual member meetings and summits
- Member contact directory - Contains valuable administrative and contact information for FS-ISAC member institutions
- Community Institution Council (CIC) - Peer community institutions are brought together to identify common concerns and develop actions and industry best practices to address those issues and strengthen policies. The CIC assists community institutions in achieving mature security programs and more effective security and risk solutions by leveraging internal, industry and government contacts and subject matter experts to help institutions with their prioritized objectives.
- Payments Risk Council (PRC) - Share information on current threats and payment risk mitigation for ACH, wire and check payments. The PRC is responsible for producing the CAPP (Cyber Attack against the Payment Process) threat exercise. Hundreds of financial institutions use the annual CAPP exercise to test and train incident response teams.
- The Broker Dealer Council (BDC) provides a forum to assist FS-ISAC members who have an involvement within the Broker Dealer community related to solving cybersecurity challenges. The BDC focuses on the collaboration of critical security threats facing members that are involved in the broker dealer services, and also focuses on information sharing, current and emerging threats, and enhancing the ability for the broker dealer community to prepare, respond and mitigate the risks associated with these threats.

Research and Analyze

With access to the industry's brightest minds, FS-ISAC is able to quickly assess any situation and recommend response strategies. Upon receiving a submission, FS-ISAC's Security Operation Center analysts verify and analyze the threat and identify recommended solutions before alerting FS-ISAC members.

Gather Information

FS-ISAC is the preferred distribution vehicle for threat information from:

- Members - Members share information through anonymous and attributed submissions and listserv. They can also submit topics of interest for member surveys.
- Government agencies - Domestic and international government agencies contribute intelligence and collaboration
- Partners – iSight Partners, Secunia, MSA, NC4 and others
- Industry Regulators

Disseminate Insights

FS-ISAC offers a wide range of channels to distribute information, depending on the nature of the information and the urgency with which it needs to be communicated.

- Crisis Notifications - In the event of a crisis, the FS-ISAC uses its automated service, the Critical Infrastructure Notification System (CINS), to reach its membership in a matter of minutes via multiple communication channels (voice, email, pager, SMS text).
- Email Notifications - Members can customize email notification preferences to ensure they receive just the information relevant to their operations.
- Watch Desk - Security analysts are available via email and fax to address specific mitigation strategies
- Daily Summary Report - A daily digest is created for quick perusal of the current state and previous day's events in an easily consumable format.
- Monthly Cyber Security Tips Newsletter - A newsletter with the latest security tips can be customized with your organizations name and logo to be sent to employees and customers.
- Soltra Edge – The first industry driven threat intelligence sharing platform. Soltra Edge is designed to facilitate the collection of cyber threat intelligence from various sources, convert it into an industry standard language and provide timely information on which users can decide to take action to better protect their company.
- Weekly Risk Summary – A weekly risk summary for C-suite management provides a high level recap of security threats, impact to Financial Intuitions and remedial steps.

Membership Sized to Fit Your Institution

FS-ISAC community bank members take advantage of a host of important benefits, including early notification of security threats and attacks, anonymous information sharing across the financial services industry, regularly scheduled community institution council calls, payment risk council calls, and member meetings for a smaller membership fee than larger financial institutions.

Basic Membership	Core Membership
\$250 for one user ID	\$850 for 4 user IDs

About FS-ISAC

The Financial Services Information Sharing and Analysis Center (FS-ISAC) is a non-profit corporation that was established in 1999. The FS-ISAC is a member-driven organization whose mission is to help assure the resilience and continuity of the global financial services infrastructure and individual firms against acts that could significantly impact the sector's ability to provide services critical to the orderly function of the global economy. The FS-ISAC shares threat and vulnerability information, conducts coordinated contingency planning exercises, manages rapid response communications for both cyber and physical events, conducts education and training programs, and fosters collaborations with and among other key sectors and government agencies.
